CHUCK C.WILLIAMS, JR.

ORMOND BEACH, FL · 720.924.6125 ·CHUCK@SCREENSCHOLAR.COM

Patented software developer. Terrestrial radio show & podcast co-host. Public speaker. Crypto-freedom activist & evangelist.

Evolved, empathic problem solving involves clear assessment of reality, honest & transparent communications, and the capability to push through to results. *I make this work my art.*

Listed as inventor of 2 patents (Shutterfly's Photobook Application, and Level3's Dynamic Prompt System). History with visual design and User Experience (UX) oriented strategies and implementations. Current favorite technologies now include React/Redux/Firebase, AngularJS, NodeJS, MongoDB and the related ecosystem of build and dependency management tools (Webpack, Jest, Gulp, Grunt, Bower, etc.).

Contributed to projects affecting the Office of the Director of National Intelligence (ODNI which oversees the FBI & CIA). Facilitated projects with National Geographic, Discovery, and The Learning Channels, Qwest and Level 3 Communications. Authored code for FedEx's Print Online Application allowing customers to upload and retrieve documents from FedEx Office Locations.

Strengths include excellent business communications skills, measurable productivity, strategic planning, project direction, team management, and elegant problem solving in the realms of application code, systems architecture, and data management. Also heavy advocate for purposeful living, empathy, meditation, and radical transparency.

Twenty-consecutive-year history with ECMAScript (JavaScript & ActionScript), HTML, & CSS. Also competent with React, AngularJS, NodeJS, PHP, ColdFusion, MySQL, MSSQL, OracleSQL, Grunt, Adobe Fireworks, Photoshop, Illustrator, InDesign, 3D Studio MAX, Ableton Live, and Audio Mixing Board technology. Familiar with design patterns, client relations & presentations, and digital innovation and transformation strategies.

EXPERIENCE

TECH LEAD / DEVOPS / AUTOMATION, PROCESS, & UX FULL STACK DEVELOPER

December 2018 - Present

EQUA START, LLC: DENVER, COLORADO & REMOTE

I teamed up with Equa to build a new and innovative way of managing agreements, and owning entities (like LLC's and Legal Trusts). I bring value to the team by analyzing, developing, and managing client service processes, developing automation, authoring code, designing UX flows, and building application interfaces and integrations in partnership with the client success team, and orchestrate that work in concert with multiple development teams. Reporting directly to the COO, I also monitor and guide the Equa application development process, and how the application flows directly integrate into client service processes. I then target areas of high-friction for automation improvements. I also conduct Microsoft Platform DevOps, User Administration, and Email/Domain Management, as secondary objectives to making ownership and value transfers in orginazational entities easy with the Equa Agreements Platform.

RADIO & PODCAST SHOW CO-HOST
